VET POWER - EMPOWERING VET IN WORK-BASED LEARNING, ELECTRICITY, AND INTERNATIONALISATION STRATEGY

VET-POWER is a capacity building project that aims to strengthen the skills of trainers and improve the quality of vocational education in Africa and Europe. VET-POWER was born from the collaboration between six international partners that's brings together European and African institutions with the common goal of innovating and improving vocational training , responding to the needs of an ever-changing world of work.

### DISCOVER THE PROJECT

VET Power is a 3 year-project co-funded by the Erasmus+ Capacity Building programme. It builds on four years of successful collaboration through the SAAM (Supporting Alliance for African Mobility) pilot mobility scheme project. The project aims to further strengthen the achievements of SAAM, involving a diverse spectrum of stakeholders active in the field of VET in Benin, Burkina Faso, Cameroun, Spain, Italy and France.

### STUDY VISITS

From 4 to 8 May, a study visit was carried out by SCF, represented by its member organisation CEFAL, in Cameroon at the Technical and Vocational Training Institute in Ebolowa. Giacomo Sarti, head of international networks and projects, and Claudio Testoni, teacher of IeFP courses for electricians, had the opportunity to visit the Center facilities, accompanied by the Director, and meet the teachers and students in the electrical sector.
