VET POWER - EMPOWERING VET IN WORK-BASED LEARNING, ELECTRICITY, AND INTERNATIONALISATION STRATEGY

VET-POWER is a capacity building project that aims to strengthen the skills of trainers and improve the quality of vocational education in Africa and Europe. VET-POWER was born from the collaboration between six international partners that's brings together European and African institutions with the common goal of innovating and improving vocational training , responding to the needs of an ever-changing world of work.

## NEW SKILLS GAP ANALYSIS IN ELECTRICITY

The Skills Analysis in the Electricity Sector and Recommendations is the first deliverable of VET-POWER's Work Package 2, submitted to the European Commission in October. It is divided into three main parts: an overview of the vocational training context in the three target countries, a focus on local vocational training centers and the needs of learners and local companies in the electricity sector.

## UPCOMING CAPACITY BUILDING IN MANAGEMENT AND PEDAGOGY

Capacity Building in Management and Pedagogy is a key pillar of the VET POWER project, aiming to strengthen the skills of teachers, managers and in-company tutors. Through a mix of training, mobility and knowledge exchange, WP3 develops targeted strategies and resources to enhance VET staff competencies and support high-quality, future-oriented vocational education.

## INTERNATIONALISATION IN AFRICAN VET SCHOOLS

Mundus led a diagnostic process across VET centers in Benin, Burkina Faso, and Cameroon resulting in the Gap Analysis on Internationalisation (Milestone 4.1). The analysis reveals key needs and confirms internationalisation as a transformation driver, identifies operational barriers, and guides the transfer of best practices from European partners.
